In the tradition of The Chicago Manual of Style:

# A Manual of Style for the **Astrophysical Journal and Supplement Series**

While in general conforming to the conventions set forth explicitly in The Chicago Manual of Style (13th ed., 1982), The Astrophysical Journal has various style and technical considerations that are, because of its nature, unique to the field. The style manual for the Journal - a "how-to" guide for those seeking publication in the Journal - addresses these unique considerations and

- EXPLAINS the style and conventions of the Journal
- · GIVES INSTRUCTIONS for the preparation of figures
- DISCUSSES common stylistic errors
- HELPS ENSURE consistency and accuracy of papers and CONTRIBUTES toward rapid publication
